Samsung Prism Objective 3:

Already Done:

1. Did the mathematical formulation of the parameters and did and logic reasoning behind it.
2. K means source code generation and understanding

Objective:

1. Pseudocode generation of the naive K means approach using given logic
2. Algorithm generation for the naive K means approach
3. Optimizing the code to get a better result

Preference:

Prefer this meet link to get a good idea about the logical reasoning behind the algorithm

[Pseudocode Generation mechanism logic](#)
